Re: Fitch Fuel Catalyst

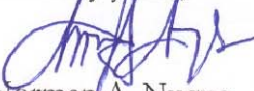

Ref: DG 2 FFC
Date: 2005.09.07

To Whom It May Concern:

Working in conjunction with Davies Energy Systems, Inc. (DESI), we recently undertook trial for a period of 35 days on one of our gensets (Wartsila 6L32 with an output of 2.3 MW) in order to realize fuel savings. After the trial period, the results that came in were promising.

Comparing consumption before and after the fitting of Fitch Fuel Catalyst, significant fuel savings were achieved and the Return of Investment (ROI) would likely be in the vicinity of 3 to 4 months. This is particularly encouraging in the light of rising fuel cost. This is a system that we would consider fitting to all our gensets.

Sincerely yours,

Norman A. Nuque
